NOT ATX COMPATIBLE

POR# Button

Module Power Good LED

FAN

VADJ Voltage Selection:

Default set 1.8V
Sheet 5-6

If no jumper insert, VADJ will become 3.3V
MicroZed PWR Ctrl

NOTE:
The following resistors MUST BE CHANGED if R38 is populated (to allow 12V to be put on the 5V rail):
Change the following resistor values from default to the appropriate value listed below:
1) R77 from 680 to 1.63K
2) R81 from 220 to 530
