The PicoZed™ FMC Carrier Card supports development of PicoZed-based designs with a platform containing all the necessary interfaces and I/O expansion required for the PicoZed System-on-Module. The carrier card provides connector interfaces for the on-module Gigabit Ethernet PHY and USB PHY, and also supports common processor system interfaces including µSD card and USB-UART. A majority of the PicoZed’s programmable logic I/O are made available through an LPC FMC connector. In addition, an HDMI output port, a second Gigabit Ethernet port, and several peripheral module connectors are included. The four serial transceivers on the 7015 and 7030 SOMs are allocated to a x1 PCIe Gen2 card edge interface, the FMC connector, a SFP+ cage, and a general purpose SMA interface.

FEATURES

- Memory
  - microSD card socket with 4GB microSD Card
- Communications
  - x1 PCIe Gen 2
  - SFP+ cage
  - SMA port for GTX/GTP
  - 10/100/1000 Ethernet connector
  - 10/100/1000 Ethernet PHY and connector
  - USB 2.0 connector
  - USB UART
- User I/O
  - FMC (Low Pin Count)
  - PS Pmod (Shared with eMMC)
  - PL Pmod #1 (7015/20/30 only)
  - PL Pmod #2 (7015/30 only)
- Other
  - HDMI output port
  - JTAG configuration port
  - Programmable clock mux
  - SMA reference clock input
  - User push buttons and LEDs
  - Adjustable bank voltage power supplies
